Key	Summary	Upgrade notes	Components
NXP-12740	Allow displaying a warning message on production servers	new runtime property "org.nuxeo.prod" must be set to "true" for the warning message to be displayed	Admin Cente Ergonomy &
NXP-12412	Provide quick ways to change default-repository-config.xml for standard options	The following nuxeo.conf variables are now available: nuxeo.vcs.blocking-timeout-millis=100 nuxeo.vcs.idle-timeout-minutes=10 nuxeo.vcs.fulltext.disabled=false nuxeo.vcs.noddl=false nuxeo.vcs.idtype=varchar	Configuration

NXP-12435	Remove / Migrate remaining QueryModels	Removed modules:
		- deprecated addon nuxeo-platform-user-dashboard-compat (relying on jbpm addon) has been removed as it relies on query models
		
		Removed extension points:
		- org.nuxeo.ecm.core.search.api.client.querymodel.QueryModelService
		- org.nuxeo.ecm.webapp.search.SearchUIConfigService
		- org.nuxeo.ecm.webapp.pagination.ResultsProviderService
		
		Removed services:
		- org.nuxeo.ecm.core.search.api.client.querymodel.QueryModelService
		- org.nuxeo.ecm.webapp.pagination.ResultsProviderService
		- org.nuxeo.ecm.webapp.search.SearchUIConfigService
		
		Removed interfaces:
		- org.nuxeo.ecm.core.search.api.client.querymodel.QueryModel
		- org.nuxeo.ecm.platform.ui.web.api.ResultsProviderFarm
		
		Removed seam components:
		- documentChildrenSearchFarm
		- documentChildrenFarm
		- queryModelActions
		- sortActions
		- resultsProviderCache
		- domainActions
		
		Removed seam context variables:
		- currentDocumentChildren
		- currentChildrenSelectModel
		- currentOrderedChildrenSelectModel
		- sectionOrderedChildrenSelectModel
		
		Removed methods:
		- NavigationContext:
		  - getCurrentDocumentChildren
		  - getCurrentDocumentChildrenPage
		  - invalidateChildrenProvider
		
		- DocumentActions:
		  - getChildrenSelectModel
		  - getSectionChildrenSelectModel
		  - checkCurrentDocAndProcessSelectRow (see DocumentListingActionsBean instead)
		  - processSelectRow (see DocumentListingActionsBean instead)
		  - checkCurrentDocAndProcessSelectPage (see
			Content View Search / Que

Key	Summary	Upgrade notes	Components
		DocumentListingActionsBean instead) - processSelectPage (see DocumentListingActionsBean instead) - DeleteActions: - getDeletedChildrenSelectModel - getCurrentDocumentDeletedChildrenPage - getSearchDeletedDocuments - setSearchDeletedDocuments - OrderableDocumentActions - getCurrentOrderedChildrenSelectModel - getSectionOrderedChildrenSelectModel Removes features: - classification roots display in dahsboard in classification addon Removed templates: - /incl/documents_table_virtual_nav.xhtml (not added to resources-compat module) - /incl/syndication_buttons.xhtml (not added to resources-compat module) - /incl/tabs/forum_content.xhtml (added to resources-compat even if now useless) - /incl/forum_table.xhtml (added to resources-compat even if now useless) - /incl/documents_table.xhtml (added to resources-compat even if now useless) - /incl/documents_table_trash.xhtml (added to resources-compat even if now useless) - /incl/user_services.xhtml (added to resources-compat even if now useless) - /incl/user_services_galaxy.xhtml (added to resources-compat even if now useless) - /classification/dashboard_classification_roots.xhtml (added to resources-compat even if now useless) - /incl/search/search_columns.xhtml (added to resources-compat module) - /incl/documents_tables_with_popup.xhtml (added to compat) - /incl/clipboard.xhtml (added to compat) - /incl/section_clipboard.xhtml (added to compat) - /incl/sections_table.xhtml (added to compat) - /incl/syndication_buttons.xhtml (added to compat) - /incl/trash_clipboard.xhtml (added to compat) The template at /layouts/layout_listing_template.xhtml has been kept for tables that do not need selection nor sort, because it's still used in different places (users/groups listings in admin center for instance).	
NXP-12572	Improve style of no document / no result sentences	Remove the css class: clipboardEmptyMessage Replaced by generic css class: emptyResult	Content View Ergonomy &
NXP-12319	Redis base support	To configure Redis, this extension point can be used: <extension target="org.nuxeo.ecm.core.redis.RedisService" point="configuration"> <redis disabled="false"> <prefix>nuxeo:work:</prefix> <host>localhost</host> <port>6379</port> <password>secret</password> <database>0</database> <timeout>2000</timeout> </redis> </extension>	Core

Key	Summary	Upgrade notes	Components

		To use the Redis service, do:
		
		`RedisService redisService = Framework.getLocalService(RedisService.class);`
		
		This service currently provides two methods:
		
		`redisService.getJedisPool();`
		`redisService.getPrefix(); // should be used as prefix for any key`
		
		Standard usage pattern is:
		
		`protected Jedis getJedis() {`
		`    return redisService.getJedisPool().getResource();`
		`}`
		
		`protected void closeJedis(Jedis jedis) {`
		`    redisService.getJedisPool().returnResource(jedis);`
		`}`
		
		`protected void myMethod() throws IOException {`
		`    Jedis jedis = getJedis();`
		`    try {`
		`        // ... use jedis here ...`
		`        // ... all keys should be prefixed with redisService.getPrefix()`
		`    } finally {`
		`        closeJedis(jedis);`
		`    }`
		`}`	

NXP-12930	Improve concurrent update detection and behavior	A new ConcurrentUpdateException (subclass of ClientException) may be thrown during a save() when a low-level concurrency issue is detected. It is up to the application code to rollback the transaction and retry if possible.	Core, Core SQL St

NXP-12988	Allow configuration of facets that are never per-document	To specify that a facet is, for search purposes, always defined on a type and never on document instances, use in default-repository-config.xml (or its template):
		
		`<indexing>`
		`  <neverPerDocumentFacets>`
		`    <facet>SomeFacet</facet>`
		`    <facet>AnotherFacet</facet>`
		`  </neverPerDocumentFacets>`
		`  ...`
		`</indexing>`
			Core SQL St
			Search / Que

NXP-11457	Allow flexibility in assignment of properties to table columns in VCS	In the default-repository-config.xml it's now possible to specify where each field goes, using <field> elements inside the <schema> element.
		
		`<field table="tablename" column="columnname">prefixed:fieldname</field>`
		
		The table or column can be omitted if they don't need to be changed. If specified, they must be in the same case as in the schema defining the existing table (usually lowercase). The field must be prefixed if and only if the schema is defined with a prefix.
		
		For instance Nuxeo has an implicit configuration equivalent to the following (which you must not repeat):
		
		`<schema>`
		`  <field table="hierarchy" column="majorversion">major_version</field>`
			Core SQL St

Key	Summary	Upgrade notes	Components

		`<field table="hierarchy" column="minorversion">minor_version</field>`
		     `</schema>`
		
		If you want to move the dublincore title to the "hierarchy" table, you can do:
		
		   `<schema>`
		     `<field table="hierarchy">dc:title</field>`
		   `</schema>`	

NXP-11919	Clean img directory from nuxeo-webapp	Moving to resources-compat module: /img/theme_galaxy/* bg.gif cnt.bg.gif core_servers.gif fond_error.gif logo_error.gif rightsadd_bar.gif syndication_bar.gif syndication_button.gif	Ergonomy & Seam/JSF U
NXP-10928	Icons > Update and clean old icons	Move to nuxeo-resources-compat addon: * arrow_down.gif * attachment.gif, attachment.png * blog_folder.png, blogpage.png, blogpage_100.png, blogsite_100.png (also availables in the webengine addon) * blue_arrow_tool.png * calendar.gif * collaboration.png * checkbox_false.gif, checkbox_true.gif * contextuallink.png, contextuallink_100.png * dashboard.gif * directories.gif * home.gif * info.gif, info.png * logout.gif * message.png * move_all_left_black.gif, move_all_right_black.gif, move_down_black.png, move_end_black.png, move_left_black.gif, move_right_black.gif, move_top_black.png, move_up_black.png * txt.png * user_go.png * webpage.png, webpage_100.png, website.png, website_100.png (also availables in the webengine addon) * bin_closed.png	Ergonomy &
NXP-12999	Enable Double click shield by default	Double Click Shield is enabled by default.	Ergonomy & Seam/JSF U
NXP-10949	Can't change label of default metadata view fragment on summary	All summary widget types that used to hardcode their label should be added the control "handleLabels" to true, and should define an empty label to get back the old behaviour.	Ergonomy &
NXP-12390	NXP-8132 Feedback messages and Admin message should be closable	'message_banner.xhtml' template has been changed to use new tag 'nxh:messages' that uses jQuery Ambiance plugin to display the Faces Messages. If you overrode the template, you need to update it to use the new tag. The 'h:messages' tag still work but it won't push notification to the jQuery plugin.	Ergonomy &
NXP-12791	Upgrade to org.osgi.core 4.2.0	Upgrade/replace org.osgi:osgi-core:4.1 with org.osgi:org.osgi.core:4.2.0	Infrastructure

Key	Summary	Upgrade notes	Components
NXP-12557	Activate Jacoco only for Sonar analysis	Running a quality analysis with Sonar+Jacoco now requires activation of the Maven profile "sonar".	Installers / A
NXP-12823	Remove deprecated Nuxeo Core Client	Removed deprecated org.nuxeo.ecm.core:nuxeo-core-client	Java client
NXP-9343	Detect if a SNAPSHOT package must be replaced	Return type of org.nuxeo.connect.update.standalone.PackagePersistence.getState(String) changed from int to org.nuxeo.connect.update.PackageState	Launcher
NXP-11992	Update action templates to use generic actions by type	actions in USER_MENU_ACTIONS or USER_SERVICES_BOTTOM must be added the type "bare_link" if they need to display a rest URL (if their link is not starting with "#{"). category USER_SERVICES_BOTTOM is deprecated, USER_MENU_ACTIONS or USER_SERVICES should be used instead. actions in category SEARCH_BOX_TEMPLATE are not displayed in header anymore, use actions of type "template" in category SEARCH_ACTIONS instead. actions in category SEARCH_LINKS are not displayed in header anymore, use actions of type "bare_link" in category SEARCH_ACTIONS instead.	Layouts / Wi Seam/JSF U
NXP-12824	Remove deprecated Nuxeo Web Embedded Distribution	Removed deprecated org.nuxeo.ecm.web:nuxeo-web-embedded-distribution	Packaging, S
NXP-12508	NXP-12479　Adapt user/group to pagination system	The AbstractGroupsPageProvider class is now a parametrized class. If you were extending this class, you probably need to parametrized it with DocumentModel. If you were extending GroupsPageProvider, you have nothing to change.	Rest API
NXP-12671	Cleanup templates in nuxeo-platform-webapp	removed very old unused templates, no migration available for them	Seam/JSF U
NXP-12605	Add access key navigation with actions	The helper for available access keys on the page is displayed when pression "MAJ+h"	Seam/JSF U
NXP-9384	Allow using Ajax for tab switching	Runtime property nuxeo.jsf.useajaxTabs can be set to "true" to activate the ajaxified behaviour	Seam/JSF U
NXP-12566	In bulk edit, when you edit a filed which is a select2, the check box is not automatically checked	Naturally fixed with ~~NXP-12635~~	Seam/JSF U
NXP-8652	NXP-11728　Remove doc types "blog" and "website" from default platform	Blogs and Websites icons from DM are now in the addon, and are duplicated into the resource-compat module just in case.	Seam/JSF U
NXP-12929	Fix typo in DocumentMetadataGroupComputerDescriptor class	Fix typo contribution item name documentMetadataGroupComuter to documentMetadataGroupComputer	Security / Rig
NXP-10931	NXP-10928　Icons update > Tree	Move blue_arrow_tool.png to resources-compat	Style & CSS
NXP-11970	CSS > Remove old classes	CSS class removed: .archiveTabContent .archiveTabContent .notEditable .archiveTabContent .currentDocumentInformation .taskAssign .taskActions .closedContent .relationCommentList	Style & CSS
NXP-12625	Add Label generation logic in Computer Group	Add a new interface for Group Computer (GroupComputerLabelled) specifying the Group Label Management. Implementing a Group Computer with this interface will automatically improve Group produce with the label express into the getLabel Method.	User prefere
NXP-12749	Fix automation module deployment when using dev mode	webengine dev mode has been removed	WebEngine

Key	Summary	Upgrade notes	Components
NXP-12840	Workflow task form control are not double click shielded	Workflow controls are now based on commandButton	Layouts / Wi Workflow
NXP-12621	Add posibility to clean up old workflow instances	From 5.8 by default, completed workflow instances are removed. The clean-up is triggered daily at midnight. (by a scheduler with the id 'workflowInstancesCleanup' -that can be overridden to change its quartz expression). If you want to keep these workflows add the following line in nuxeo.conf: nuxeo.routing.disable.cleanup.workflow.instances = true By default the number of instances deleted every time the scheduler is trigger is set to 100. This can be changed by setting the property 'nuxeo.routing.cleanup.workflow.instances.batch.size' in nuxeo.conf.	Workflow
